

for an excellent finish

# Abrasive sleeves: CERAMIT CN 466 Z

## High-performance abrasive cloth sleeves for metalworking

### Product benefits

- Hard and sharp ceramic abrasive grit ensures high stock removal rates and long tool life
- Very tear-resistant cloth backing for high belt tensions
- Low grinding temperatures due to additional temperature-reducing coating
- Suitable for applications with high grinding pressure
- Especially suitable for dry grinding of stainless steel

### Applications

#### Metal working:

- General metalworking in hard-to-reach areas

#### Automotive body shop:

- Defect grinding of steel car bodies with abrasive sleeves on straight grinders

#### Tools:

- Circular saw blade, circular blade side

### Product design

Type:	CERAMIT CN 466 Z
Grain:	Ceramic core
Bonding:	Synthetic resin, with active ingredient coating
Backing:	Z cloth
Coating:	Closed
Grit range:	+ 24/36/40/50/60/80

### Stock programme Abrasive sleeves: CERAMIT CN 466 Z (Width x Ø)

- Standard design
- 1 3/16" x 1 3/16" mm
  - 1 3/16" x 1 25/32" mm
  - 1 3/16" x 1 9/32" mm
