

for an excellent finish

Rolls: FB 637

Highly tear-resistant abrasive film rolls with aluminum oxide grain

Product benefits

- Highly tear-resistant and uniform film backing ensures reliable process for superfinishing
- Compression-resistant film backing for tolerance ranges of the roughness values for precision grinding
- High stock removal rates
- Excellent tool life and shorter machining times
- For universal applications: oil and emulsion-resistant

Applications

Engine components:

- Superfinishing applications in the engine and transmission industry

Tubes, rods, wire:

- Defect grinding and finishing of rollers

Product design

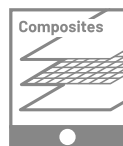

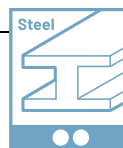

Type:	FB 637
Grain:	Aluminum oxide
Bonding:	Synthetic resin
Backing:	Film
Coating:	Closed
Grit range:	P 120/180/240/280/360/400/500/600/800/1000/1200/1500/2500/4000

Stock programme Rolls: FB 637 (Width x Length)

With grooved plastic core

3 15/16" mm
3 15/16" / 100 mm

Very suitable
